

LEGO

LANGUAGE LABS

Play • Build • Communicate • Connect

A FUN AND ENGAGING LEGO-BASED PLAY THERAPY PROGRAM DESIGNED AND FACILITATED BY SPEECH PATHOLOGISTS IN SMALL GROUPS.

Through hands-on LEGO play, children will have opportunities to develop & practice:

- Language skill development
- Problem-solving and flexible thinking
- Confidence communicating with peers
- Social communication and interaction
- Listening and following directions

What is LEGO based play therapy?

The LEGO Based Play therapy program supports children and teens to build communication, social confidence, and teamwork skills through structured play-based group sessions. Originally developed in the mid 1990's by Paediatric neuropsychologist Daniel LeGoff, the model has since been refined through clinical research and widespread use across paediatric therapy, education, and social skills programs. LEGO-based therapy leverages a child's intrinsic motivation and structured play roles to support measurable growth in communication, cooperation and flexible thinking.

LITTLE BUILDERS

- Ages 4–6 years (Kinder-Prep)
- Play • Build • Talk • Learn
- 1.5 hour session
- Fee: \$130 per session

CREATIVE BUILDERS

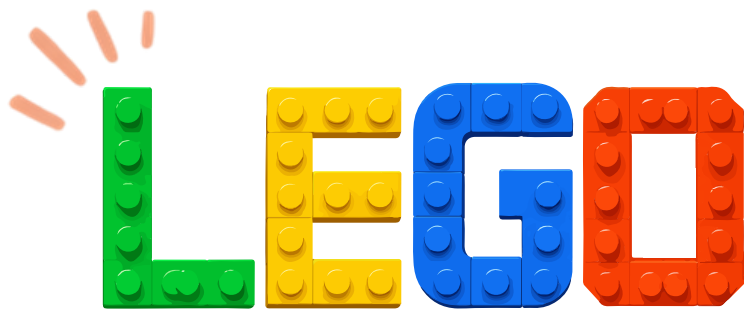

- Ages 7–10 years
- Imagine • Build • Describe • Create
- 1.5 hour session
- Fee: \$130 per session

CHALLENGE BUILDERS

- Ages 11–13 years
- Plan • Problem-Solve • Explain • Collaborate
- 2.5 hour session
- Fee: \$194 per session

LEGO provides a highly motivating and hands-on way for children to learn and practice communication skills. In our small-group sessions, children are encouraged to build, talk, listen, explain, collaborate, problem-solve and share ideas – all while having fun!

LEGO

LANGUAGE LABS

Play • Build • Communicate • Connect

LEGO Language Lab's at Speech Bubble Speech Pathology combines the enjoyment of LEGO with purposeful, evidence-informed speech pathology intervention in a supportive small-group environment. They are run in two formats as an Intensive Holiday Program and Term 10 week Program.
